

5. How will you apply what you have learned to your life?
 The right time of day affects shadows. You need to be patient with this, and throughout your life.

4. If you did this project again, what would you change or do differently?
 I would add more eggs, and change the camera setting.

3. What steps did you take to complete this exhibit?
 I waited till it was the time of day to make shadows. I put eggs in a pile and spread them out. I got my rabbit and took a bunch of pictures. Then I picked the best one.

2. What would you like to describe or share about your exhibit that we can't see easily in your uploaded photos or documentation?
 My rabbit is being feed as the Easter bunny. I used a neon camera.

1. What are three things you learned or insights you gained this year from doing this project?
 Shadows differ with the time of day. How to turn off flash. How to change the shutter speed.

Project Area: Photography 351

Club: Bailey Creek L.E.C.

Name: Andrew Brandler

Age: 12

Years in 4-H: 3

County: Kasalle County
