tip

pet store food is safe and healthy for your pet because it has all the things that your needs like vitamins!

Needs for a hamster 1#

A hamster needs his/her space sometimes they don't want to cuddle with you because they are nocturnal, that means that they sleep during the day and throughout the night they wake up and run in their wheel.

needs for a hamsters 2#

Hamsters need a big cage so they can run and have fun they also need a wheel, all rodents love to run all the time that's why hamsters need a wheel.

They need bedding, nesting material, a house or a hideout, food/food dish, water bottle and chew toys so their teeth can grow nice and strong.
