

# Scoring and Sizes of Targets

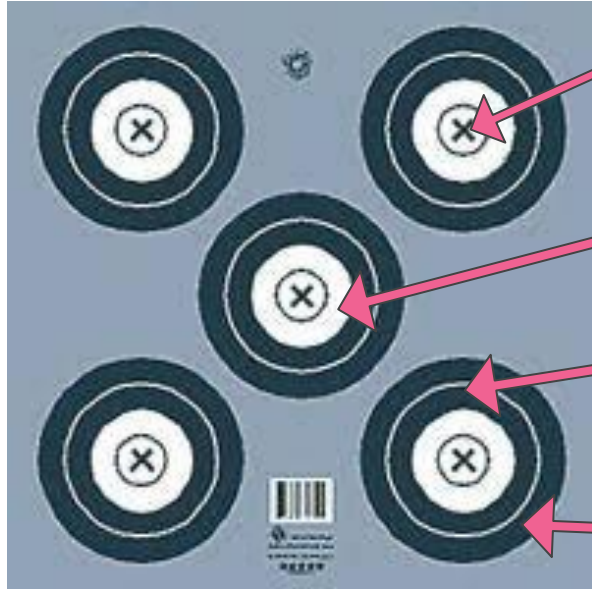

**By: Emilee Mortensen**

# 10 Yard Background

The 10 yard target is a lot different than scoring the other targets. This is because there are five “mini targets” on a single target. There are also less rings on each target. The 10 yard target has 3 rings along with 10x ring found in the middle of each of the five targets. It is also different because on the ten yard target you only shoot one arrow at each of the five targets.

# Ten Yard Scoring

The first white ring is worth 10 points. If your arrow touches the X it is marked as a 10x. While this marking is still only worth 10 points it is counted separately and used in tie breakers.

The second white ring is worth 9 points.

The first blue ring is worth 8 points.

The second blue ring is worth 7 points.

# 10 Yard Size

One full 10 yard target ring has a diameter of 6.25 inches, and a circumference of 19.6 inches.

Each ring is 0.75 inches thick.

Each color is 1.5 inches thick.

The 10x is 0.75 inches by 0.75 inches.

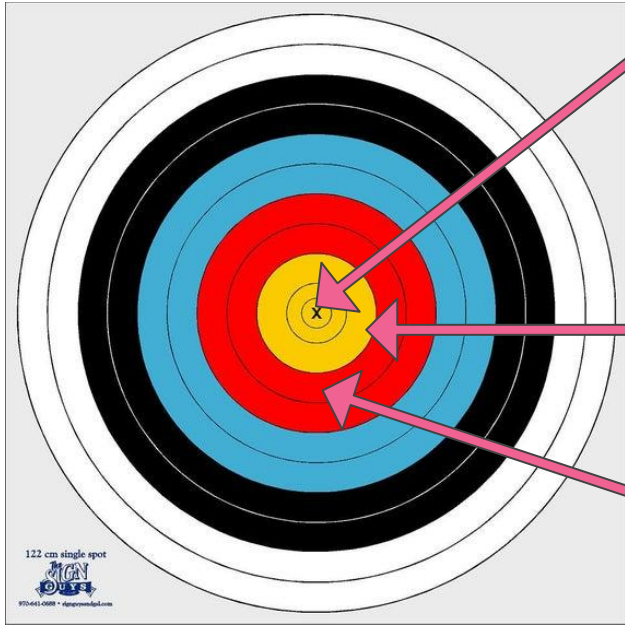

# 20/30/40 Yard Target Background

While the target for the 20 yard, 30 yard, and 40 yards are all scored the same, the sizes of all the targets are very different. The common target has 10 main rings along with an 11th 10x ring. The rings have two rings per color. The colors in order from inside to out are yellow, red, blue, black, and white.
